brick effect catalogue 2024

TERRIX[®]
stone & brick

Best in Class A Flame retardency

Non organic means no spread of flame

No cavity required for SFS or timber frame

Vapour permeable (fully breathable)

Long lasting colour-Keeps our cities bright

Black mould and algae resistant

Chemical bond means no delamination

No risk of cracking

No water penetration

Frost resistant

No flashing meaning, minimal long term maintenance

Speed of application outperforms any other comparative system

**TERRIX EWI RENDER SYSTEMS
ARE THE PERFECT COMBINATION**

 **TERRIX**[®]
stone & brick

properties

Welcome to our Terrix® Brick Slip catalogue, a comprehensive showcase of our technically sophisticated and visually unique facade solutions.

With state-of-the-art technology and extensive experience, our dedicated team is proud to present the Terrix® BSS-1 Brick Slip System. This pioneering product sets a new standard in the market. This system, crafted using the highest quality quartz sand and special resins, is indistinguishable from genuine brickwork in its exceptional realism. The Terrix® brick slips are aesthetically pleasing and boast unique properties. They are fire-resistant, waterproof, vapour-permeable, and resistant to algae growth, ensuring a lightweight and durable product.

These brick slips come in various standard colours and four textures, with the option for custom colours on request. Our innovative manufacturing process ensures that each tile is unique in colour and texture, creating facades that emulate traditional bricks with stunning accuracy.

The Terrix® brick slips are incredibly light, allowing for their application on almost any facade without additional reinforcement or foundation. By choosing our system, you're opting for a solution that is durably bonded to the substrate, offering long-lasting performance and a remarkable aesthetic appeal.

main properties

light weight (4kg/m²)

vapour permeable

easy installation

high flexibility

frost resistant

algae resistant

fire resistant
(cat. A2 for m. wool based EWI system)

great value

required tools

spirit level

scissors

small paint brush

tape

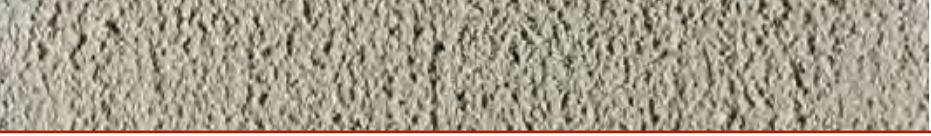

notched trowel

Terrix® brick slip does not require any complicated tools to install. All you need is a spirit level, notched trowel, a small paintbrush, pencil, scissors and measuring tape.

The installation process itself is similar to tiling, but it is much simpler than it. One applicator can apply up to 80m² Terrix® brick slip a day.
