

New office building Manchester

TERRIX® CIS-1 Carpark Insulation System Can be used on new or existing (retrofit) ceilings.

TERRIX® CIS-1 system is designed for insulation of ceilings in closed and open unheated rooms, above which there are heated rooms, e.g. in garages, parking lots and basements. Made of non load-bearing construction elements it can contribute to durability by providing enhanced protection from the effect of sound proofing and fireproofing.

The Terrix® systems are the best product available due to its unique features:

- **Best in Class A Flame retardancy**
- **Non organic means no spread of flame**
- **The system can be designed to any required U Value**
- **Vapour permeable (fully breathable)**
- **No disturbance to the sub structure of the building**
- **Black mould and algae resistant**
- **Chemical bond means no delamination**
- **Aesthetically pleasing attractive finish**
- **No water penetration**
- **Minimal long term maintenance**

Terrix® systems offer a uniquely chemical bonded product.
