## Terrix PL-SX Spray Plaster

Ready-to-use plaster coat for machine levelling of interior walls and ceilings.

Bam Construction chose to use the Terrix plaster system over other traditional methods.

Neil Fairhurst director of Cadman Manpen Systems quotes;  
“We chose Terrix® Spray Plaster due to the quality of the smooth white finish alongside the speed and simplicity of the application. On top of this, the plaster offers the project and the client, extensively more benefits above the traditional methods previously used. A fabulous finish and both the project team and client were all very pleased with the finished result.”

**Terrix® systems offer a uniquely chemical bonded product:**

**No risk of cracking or flaking**

**Chemical accelerated set**

**Very clean application process**

**Superior quality finish**

**Consistent finish - minimal snagging**

**Additional client benefits of:**

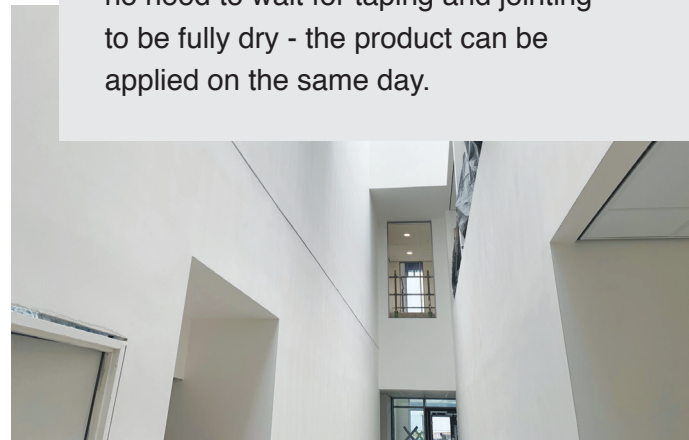

**Higher productivity outputs**

- up to 500m<sup>2</sup>/man/day.

**Ready to use - no mixing on site**

**Full vapour permeability**

no need to wait for taping and jointing to be fully dry - the product can be applied on the same day.
